

# Prekid obrade zaliha

Last Modified on 10/10/2019 9:36 am CEST

Ukoliko želimo da prekinemo sa obradom zaliha potrebno je da izbrišemo sav promet koji je prethodno evidentiran.

Na kraju ostaje početno stanje, koje je potrebno otkazati i izbrisati sve zapise koji u njemu postoje... neka ostane u Nacrtu (zelene boje).

Nakon toga, pojavljuje nam se dugme Prekid obrade zaliha. Klikom na to dugme izbrisće se sva skladišta i modul zaliha je "resetovan"...

The screenshot shows a user interface for managing inventory movements. At the top, there's a navigation bar with links like Nov, Poslovanje, Knjigovodstvo, Banka, Plate, and Šifarnici. Below the navigation, the title 'Promet zaliha' is displayed. A prominent red box highlights the 'Prekid obrade zaliha' (Stop Inventory Processing) button. To the left of the search bar, there's a 'Zatvori' (Close) button. The search bar itself has a placeholder 'Prekid obrade zaliha'. Below the search area, there are several input fields: 'Vrsta prometa' (Movement Type), 'Podvrsta prometa' (Sub-type), 'Datum' (Date), 'Analitika' (Analytics), 'Status' (Status), 'Stranka' (Party), 'Opis' (Description), and 'Broj' (Number). A table below these fields lists movement details. The first row in the table, which contains the text 'Početno stanje - prosečne cene' (Initial State - Average Prices), is also highlighted with a red box. The table has columns for 'Vrsta prometa' (Movement Type), 'Broj' (Number), 'Datum' (Date), and 'Opis' (Description). The date shown is 1.1.2016, and the description is 'Početno stanje'.
